The book is divided into three parts. The first part provides a historical overview of architectural technology, from its origins in the early 19th century to its current state. The second part examines the theoretical foundations of the field, including its relationship to architecture, engineering, and science. The third part discusses the practical applications of architectural technology, including the design and construction of buildings, the development of new materials and technologies, and the role of technology in shaping the built environment.

This book is essential reading for students of architectural technology, as well as for architects, engineers, and other professionals who work in the field. It is also a valuable resource for anyone who is interested in the history, theory, or practice of architecture.

## **Reviews**

"This book is a valuable contribution to the field of architectural technology. It provides a comprehensive overview of the history, theory, and practice of the field, and it is written in a clear and engaging style." - Professor John Peponis, University of California, Berkeley

"This book is a must-read for anyone who wants to understand the role of technology in architecture. It is a comprehensive and critical to the field, and it will be an invaluable resource for students, architects, and engineers." - Professor Mark Burry, University of Cambridge

## **About the Author**

Stephen Emmitt is a Professor of Architectural Technology at the University of Bath. He is the author of several books and articles on architectural technology, including *The Construction of Meaning in Architecture* (2009) and *The Future of Architectural Technology* (2016).
