The increasing cost of labor is another challenge facing the manufacturing industry. In many countries, the cost of labor has been rising for years. This trend is likely to continue in the coming years, as the global economy

continues to grow. Manufacturers must find ways to reduce their labor costs without sacrificing quality.

The need to become more sustainable is another challenge facing the manufacturing industry. Consumers are increasingly demanding products that are produced in a sustainable way. Manufacturers must find ways to reduce their environmental impact without increasing costs.

The manufacturing industry is facing a number of challenges in the coming years, but it is also an industry that is full of opportunity. Manufacturers that are able to adapt to the changing landscape will be well-positioned to succeed.

Here are some specific ways that the manufacturing industry can change to survive the coming years:

- **Invest in automation.** Automation can help manufacturers reduce labor costs and improve productivity. However, manufacturers must also find ways to use automation without displacing workers.

- **Reduce labor costs.** Manufacturers can reduce labor costs by outsourcing production to countries with lower labor costs. However, manufacturers must also be aware of the risks associated with outsourcing.

- **Become more sustainable.** Manufacturers can reduce their environmental impact by using more sustainable materials and processes. However, manufacturers must also be aware of the costs associated with becoming more sustainable.
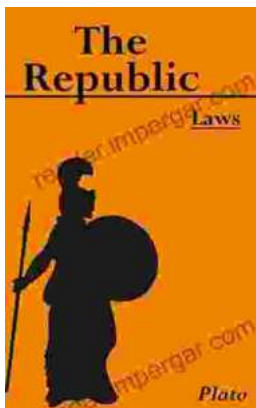

The manufacturing industry is facing a number of challenges in the coming years, but it is also an industry that is full of opportunity. Manufacturers that are able to adapt to the changing landscape will be well-positioned to succeed.
