## Career Paths

The following are some of the most common career paths for architecture graduates:

- **Architect:** Architects design and oversee the construction of buildings and other structures. They work with clients to develop the design concept, create construction documents, and manage the construction process.

- **Architectural Drafter:** Architectural drafters create construction documents, such as blueprints and plans, under the supervision of an architect.
- **Architectural Engineering Technician:** Architectural engineering technicians assist architects and engineers with the design and construction of buildings and other structures.
- **Interior Designer:** Interior designers plan and design the interiors of spaces, such as homes, offices, and commercial buildings.
- **Landscape Architect:** Landscape architects design and plan outdoor spaces, such as gardens, parks, and playgrounds.
- **Urban Planner:** Urban planners develop plans for the use and development of land in cities and towns.
- **Construction Manager:** Construction managers oversee the construction process and ensure that projects are completed on time and within budget.
- **Project Manager:** Project managers plan and manage projects from start to finish.

## **Salaries**

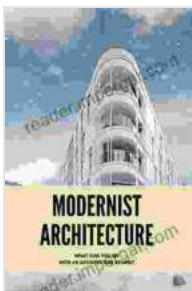

The salaries of architecture graduates vary depending on their experience, education, and location. According to the U.S. Bureau of Labor Statistics, the median annual salary for architects was \$80,720 in May 2022. The lowest 10 percent of earners made less than \$53,250, and the highest 10 percent of earners made more than \$132,880.

The salaries of other architecture-related professions also vary depending on experience, education, and location. According to the U.S. Bureau of Labor Statistics, the median annual salary for architectural drafters was \$59,640 in May 2022. The lowest 10 percent of earners made less than \$37,260, and the highest 10 percent of earners made more than \$95,700.

An architecture degree can lead to a variety of rewarding careers. Architects and other professionals in the field of architecture play a vital role in shaping the built environment. If you are interested in a career in architecture, there are many different career paths and earning potential to consider.

## Call to Action

If you are interested in learning more about careers in architecture, I encourage you to visit the website of the American Institute of Architects (AIA). AIA is the professional organization for architects in the United States, and it offers a wealth of information about the profession, including career resources, salary data, and educational programs.
